Dr. Esther Lederberg
Dept. of Genetics
Stanford University Medical Center
P a l o A l t o
Calif. - USA.

Dear Esther,

Thank you very much for sending me the W 3362 and W 3687 strains. Unfortunately I still have a problem regarding the py- and pu-less yeast mutants. I have written to dr. H. Roman in Seattle as you suggested but I have not heard from him. This was more than a month ago and I am beginning to get worried. Could you suggest any other possibility? I would certainly appreciate it very much if you could help me out of this fix.

Anna and Peter are fine but at least Anna is homesick for California now and then. They send their best regards to you and Josh.

Dear Ulf - Am very sorry about the delay.

Sincerely

*Also Dr H. Halverson

*Please write to Dr. C. Douglas
Dept Microbiol.
U. Washington School
Seattle, 50 Wash.*

(Ulf Lagerkvist)

and Dr. Hawthorne

same address as Dr. Roman, and mention that I suggested

*their names. As Harriet may have told you, we were
unable to grow even our wild type strain so
couldn't check the markers. We miss you here and
hope you and Anna have another chance to come -*
